

Corporate Functions Tech Rider

FOR VENUE, AV AND SOUND TEAMS

Solo amplified cello with backing tracks.
Compact technical requirements for corporate events.

Forward this page directly to the technician responsible for the room.

At a glance

• POSITION

Armless chair. No riser.

• DESK INPUT

XLR or 6.35 mm jack. 48 V phantom power required.

• VENUE PA

Larger rooms, outdoors, or more than roughly 100 guests.

• SOUND CHECK

60 to 90 minutes before the first set.

SELF-CONTAINED SETUP

Up to roughly 100 guests

Luke brings a speaker. The venue provides one armless chair.

VENUE SYSTEM SETUP

Larger rooms or outdoors

Provide a PA suited to the room and guest count, plus a monitor for large or outdoor venues.

Signal, playback & monitoring

Microphone

Clip-on instrument microphone to the desk via XLR or 6.35 mm jack. Requires 48 V phantom power. I carry a backup dynamic XLR microphone. Please tell me in advance if phantom power is unavailable.

Playback & connection

Bluetooth is preferred for backing tracks, so I can adjust volume, song choice and set length as the room changes. A wired connection is fine when a sound technician is on the desk.

Monitoring

I need to hear both the cello and backing track through the venue PA, or through a monitor for large or outdoor venues.

Room, timing & presentation

Amplification

I bring a speaker for rooms of roughly 100 guests or fewer. For larger rooms and outdoor spaces, please provide a PA suited to the venue and guest count.

Position & seating

Please provide one armless chair. No riser is required.

Sound check

60 to 90 minutes before the first set.

Attire

Black tie, business formal, or an agreed dress code to represent your brand.

ADVANCE CONTACT

Send the venue, guest count and run sheet to confirm the input, playback and monitoring plan in advance.
